

*If we don't take a stand for our children,
what does that say about us?*

Don't let your child become a statistic in the growing database of serious injuries and deaths

Pfizer has been convicted and fined billions for misrepresenting the risks of its products. All the major COVID vaccine companies are hiding the truth from an unsuspecting public, with cover from captured agencies and the media.

- The injections were approved under Emergency Use Authorization only. They're Phase Three trial drugs and have been proven neither *safe* nor *effective*.
- Healthy children are at no risk from the coronavirus. They don't have the receptors. It's all *risk* and no *benefit*. Morticians report a spike in deceased children since the vax.
- The injections were deemed safe for pregnant women worldwide after just 44 pregnant rats in France were treated. Two-thirds of them miscarried.

Who Are We?

We're a group of concerned citizens. We're your neighbours, co-workers, and people you pass in supermarket aisles or the bank. We're not affiliated with any organization, though we share research from organizations like Stand Up Canada to remind citizens of their right to informed consent for medical procedures. We don't claim to have all the answers, but we recognize something has gone terribly wrong with public policy in Canada.

Let's remind one another of our rights under the law, the Bill of Rights, the Charter, our Constitution and the famous Nuremberg Code. Multinational companies and corrupt agencies have an agenda that doesn't include respecting our democratic rights.

IT'S NOT A VACCINE!

...IT'S A COVERUP

IT'S NOT A VACCINE!

Please don't inject
your child.

**The COVID injections
are causing millions
of injuries and deaths
worldwide.**

It's being covered up.

Canadian Pathologist Roger Hodkinson.

What do doctors say?

Real doctors are sounding the alarm

Thousands of doctors have sounded the alarm; some refer to the injections as “clot shots.” In the Great Barrington Declaration doctors from around the world questioned the safety of mRNA experiment gene therapies and demanded respect for the historic doctor-patient relationship, without interference from unelected bureaucrats in compromised agencies.

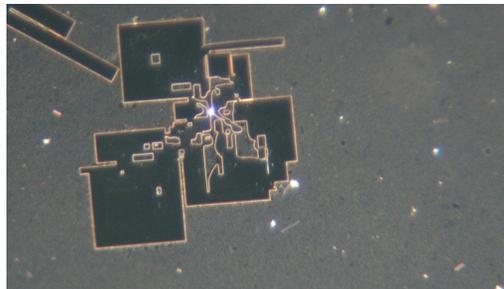

Dr. Roger Hodkinson is among many Canadian doctors sounding the alarm. Citing studies of government data, he estimates over **20 million have died directly from the shots worldwide** and **two billion injured** – many seriously. It’s believed **seven in every 10 young people may become sterile**. Birth rates in Australia have dropped by 70 per cent since the injection rollout.

Under World Economic Forum program graduate Prime Minister Trudeau, Canada has signed on to a global economic restructuring and dangerous mRNA vaccine agenda for which none of us voted. We must spare our children!

Toxins & nanotech in the injections

Microscopy research from Spain’s La Quinta Columna has been confirmed by labs on every continent: graphene oxide and self-assembling nanotech is present in the injections. These interact with 5G EMF radiation and damage the lining of veins and arteries, major organs and cross the blood-brain barrier, triggering clots, strokes, myocarditis, and a pandemic of cancers and neurological diseases. The trend is climbing higher. Shellfish toxins have also been detected as well as Cesium-137.

Labs have found toxic nanotech in the “vaccines” and blood of injected people.

This is a microscope photo of nano-scale circuitry assembling itself inside drops of COVID vaccine. The presence of such advanced technology was never disclosed to the public.

Your child belongs in their bed at home, not a hospital..

Our media has failed us

The corporate media presents only Big Pharma’s message – for one of their few remaining large revenue streams. The truth resides in alternative media that has been censored from the mainstream.

A senior Pfizer executive recently admitted to hearings at the European Parliament the company never tested its COVID vaccine for the prevention of viral spread. This is fraud on a historic scale. The lockdowns, masking and social distance measures are completely useless and unscientific.

Biotech researcher Karen Kingston’s substack offers a wealth of carefully documented information about patents pertaining to nanotech that’s been discovered in the injections. She has been interviewed several times on Zee Media, <https://zeeemedia.com>

Mike Adams (www.healthranger.com) has used mass spectrometry to determine the presence of synthetic versions of shellfish toxins in the vaccines – among the deadliest neurotoxins on earth.
